SUMMARY

Senior Frontend-focused Full Stack Engineer with 12+ years architecting and shipping web applications across enterprise consultancies and product-led startups. Experienced across React, Angular, Vue, and Svelte, with TypeScript (TS), Node.js, and NestJS backend delivery and a strong system-design and microfrontend-architecture foundation. Early, fluent adopter of Artificial Intelligence (AI) / Large Language Model (LLM) developer tooling: applies Claude, GitHub Copilot, prompt engineering, and Model Context Protocol (MCP) workflows to automate engineering pipelines and compress delivery cycle time. Sets code-quality standards, drives architectural direction, and mentors engineers toward higher output.

SKILLS

Frontend: React, Angular, Vue, Svelte, Backbone.js, TypeScript (TS), JavaScript (JS), HTML5, CSS3/SCSS, Tailwind, Bootstrap, Web Components, Microfrontends (Module Federation), Web Performance Optimization, WebSockets, Responsive User Interface (UI) Design

Backend: Node.js, NestJS, Express, RESTful Application Programming Interfaces (REST APIs)

AI/LLM & Developer Tooling: Claude, ChatGPT, GitHub Copilot, Prompt Engineering, Model Context Protocol (MCP), AI-Assisted Development, LLM Workflow Automation, Reusable Prompt/Workflow Templates

DevOps: Docker, Continuous Integration/Continuous Deployment (CI/CD), GitHub Actions

Databases: PostgreSQL, MongoDB

Testing: Jest, Vitest, Jasmine, Playwright, Cypress

Architecture & Leadership: System Design, Microfrontend Architecture, Frontend Platform Strategy, Code Review & Quality Standards, Technical Mentorship, Agile/Scrum, Jira, Git, Vite, Webpack

EXPERIENCE

Voyfai GmbH — Senior Software Engineer

Berlin, Germany | July 2025 – Present

- Engineer core frontend for a freight/logistics technology platform in React and TypeScript within a structured Agile product-development workflow, collaborating across a cross-functional squad of 7 engineers.
- Use Claude with custom Model Context Protocol (MCP) workflows to run the Jira-to-pull-request pipeline — fetching tickets, generating implementation plans, scaffolding feature branches, and opening draft pull requests — cutting average ticket cycle time by ~30%.
- Built and shared reusable prompt-engineering and AI workflow templates adopted across the team, accelerating code generation, documentation, and review.
- Drive frontend architecture and code-quality decisions, partnering with product to translate roadmap priorities into shippable, maintainable features.
- Expanding into CI/CD, Docker, and GitHub Actions to strengthen full-stack and platform ownership.

Labforward (LabTwin) — Senior Frontend Developer

Berlin, Germany | August 2022 – July 2025

- Owned and shipped frontend feature areas for a voice-powered digital lab assistant product used by ~10,000 researchers, driving software-design and product-optimization decisions.
- Led web-performance initiatives that improved Lighthouse performance score by ~25% and cut initial bundle size by ~20%, measurably improving responsiveness and user experience.
- Architected reusable component patterns and frontend standards that reduced feature-delivery time by ~15% and improved consistency across the application.
- Collaborated cross-functionally with product, design, and backend in an Agile environment, mentoring 4 engineers through structured code review.

Deloitte Digital (Deloitte USI) — Senior Consultant

Mumbai, India | May 2021 – July 2022

- Defined and enforced code-quality guidelines and review standards across 4 delivery teams, raising consistency and reducing defect rework.
- Mentored and led a team of 5 developers, accelerating their ramp-up and lifting overall team throughput.
- Resolved high-impact technical issues on client engagements and partnered across teams to deliver enterprise solutions.
- Designed and delivered an Angular 15 microfrontend architecture, enabling independently deployable modules and scalable, maintainable frontend development across teams.

Deloitte Digital (Deloitte USI) — Consultant

Mumbai, India | January 2019 – May 2021

- Delivered advanced web application features for enterprise clients using modern JavaScript frameworks.
- Translated complex requirements into production-ready solutions in collaboration with cross-functional teams.

GEP Worldwide — Senior Web Engineer

Mumbai, India | November 2017 – January 2019

- Provided technical leadership and project support across development teams, contributing to software design and product-optimization decisions.
- Delivered reliably against tight deadlines while managing competing priorities.

Capgemini — Senior Software Engineer

Mumbai, India | November 2016 – November 2017

- Built and maintained web application features, solving complex problems independently and within delivery teams.
- Prioritized and organized work to meet deadlines in a fast-paced enterprise environment.

Zeus Learning — Senior Software Engineer

Mumbai, India | January 2014 – October 2016

- Developed animated, interactive e-learning modules and reusable UI components used across multiple products.
- Supported recruitment and training of new engineers while delivering individual project work.

EDUCATION

Master of Computer Applications (MCA), Computer Science

K.J. Somaiya Institute of Management Studies and Research, University of Mumbai | 2011 – 2014

Bachelor of Computer Science

University of Pune | 2006 – 2010

AWARDS

- Spot Award — Deloitte Digital (March 2022)
- Applause Award — Deloitte Digital (September 2020)
- Applause Award — Deloitte Digital (December 2019)
- The Motivator — GEP Worldwide (March 2018)
